This pack have all everything i need, thank you. If you like Bejeweled,

then just play it and don't waste your time with this. Updates too often and the updates are huge, it's annoying. Thankfully the game isn't any good so the annoyance is only short lived.. Servers don't work DO NOT download. I highly recommend this game to anyone that likes 3rd person shooters combined with anime style chibi characters. As for cost vs. gameplay time, you will definitely get your moneys and more.

The gameplay is basic, there arent many things you have to memorize which i think is a great thing and wkich keeps the game simple. The game has an "mmo feel" to it, but is not one. You are placed into a hub where you can accept quests, craft, and purchase items. There is no story, you go to an NPC, grab a quest, do said quest, and earn rewards. And that is it, you can also repeat quests on same or higher difficulties to earn gold.

Combat gameplay is fun, not the greatest, but is solid. Although it does feel a bit sluggish, possibly due to the 30fps lock(?), but nonetheless still playable. Controllor is recommended to play this game. Im a mouse and keyboard person, but the game feels better for controllor.

\*\*\*The keyboard and mouse controls have been updated. It feels much more smoother now and there is no drag when aiming with the mouse. I now suggest using the keyboard and mouse for playing instead of controllor :) \*\*\*

Now for the good stuff, where I feel the game shines is its character customization. The crafting system is excellent. With the materials you have gathered you can discover and make new outfits, head, body, and legs. Also, you can upgrade your weapons and make them more powerful. Lastly you can earn things called badges which give you stats, as far as i can tell the stats are random so there is much fun in trying to find the perfect one.

Downside which may be a turnoff for some is the "air" mechanic. Shooting/slashing and doging use up air, so think of it as ammo and stamina combined. As you drain your air meter you either have to let it recharge by not shooting or dodging for a few seconds or pick up air orbs. But there are badges which give you increased air and air recovery so this mechanic is a little less frustrating.

Another turn off to some is that quests have a time limit, currently at 15 minutes. Now i hate time limits myself, the feeling of being pushed is not fun, but in this game it is bearable...and doable. You do get a bit of time back by clearing monsters out in a

given area. If it weren't for the other good things this game offers this would have been a deal breaker for me, so do keep this in mind.

\*\*\*this has been updated, the devs have added about 10-15 minutes to all missions. The quests are much more bearable now for solo play and hard mode solo play\*\*\*

And last downside is there is no local co-op. Only one person can play at a computer, but is multiplayer capable by joining online game rooms and joining up with others to complete quests.

Overall this game is excellent and one of a kind. If you have an interest in this game, don't hesitate to buy it, you won't regret it. I hope my review is thorough and helps you decide if you want to buy the game or not :). I like this game very much, I just do not recommend this particular Steam version which does not work! The game cannot even be launched under Win 8.1 64-bit, the process just hangs and has to be killed manually.

Very fun platformer/puzzler. About 40 levels with challenge, but not total frustration. Check out them demo for a good taste.. This is the next best thing in so-bad-it's-good-gaming.. Played ten minutes and already lost interest.. 3 is totally worth a few hours of nostalgia.. Pretty good game play if a bit monotonous. Only pick it up when its on sale. This was a cutesy game. It was very easy and very short. I took me about two hours. There was not really any puzzles. The enemy movements were easily figured out. And the ending was lacking... like altogether lacking. There wasn't one. Only worth it for \$.99.. I will not lie, this game has potential ... but still needs better in a lot, I recommend even just to support the creator and see what it becomes! Hey, creator ... a tip ... this game has the potential to become a strong title in Playstore
